SECTION 5. TERMS OF REFERENCE

TERMS OF REFERENCE FOR CONSULTANCY TO DEVELOP A LAIKIPIA COUNTY CARBON MARKETS STRATEGY.

1. Background

Laikipia County holds significant potential to participate in carbon markets through climate-smart agriculture, sustainable rangeland management, forest and landscape restoration, agroforestry, renewable energy, clean cooking, improved waste management, water conservation, and other nature-based and technology-based climate interventions.

The County Government recognizes that carbon markets can mobilize additional climate finance, support sustainable development, strengthen community resilience, generate employment and livelihood opportunities, and advance national and county climate change objectives.

However, effective participation in carbon markets requires an appropriate institutional, regulatory, technical, financial and safeguards framework to ensure that carbon projects are credible, transparent, inclusive, environmentally sound and beneficial to local communities and other stakeholders.

Realizing this potential, however, requires a sound institutional, regulatory, technical, financial and safeguards framework — one that ensures carbon projects are credible, transparent, inclusive, environmentally sound, and beneficial to local communities and other stakeholders.

The County therefore intends to develop a Carbon Markets Strategy to guide the identification, development, financing, implementation, monitoring and management of carbon market opportunities within the County.

This Strategy and Investment Framework will offer a practical roadmap for the County Government, communities, private investors, development partners and other stakeholders to engage in carbon markets, while ensuring compliance with applicable Kenyan laws, regulations and standards, as well as international carbon market requirements.

2. Purpose of the Consultancy

Despite Laikipia's significant carbon assets and emerging carbon revenue streams, the county lacks a comprehensive, county-level strategy to guide carbon market engagement and investment prioritisation.
